

BDP 50/1500 C

The ultra-high-speed machine BDP 50/1500 C achieves up to 30% higher productivity than traditional high-speed machines when polishing smooth high-gloss floors.

1 Integrated vacuuming system

- The guard ensures that polishing dust stays under the machine. The dust is collected in the dust container by passive vacuuming to reduce dust impact while polishing.
- Any dust collected is easy to empty - the filter bag is reusable.

2 Automatic contact pressure

- The pad drive board is spring-mounted. The contact pressure is automatically regulated for consistent polishing results.
- The pad maintains optimal surface contact and follows any floor unevenness.

3 Central wheel

- For cleaning right up to edges - also forwards.

BDP 50/1500 C

- Mains operation for uninterrupted use
- With central guide wheel - polishing up to the edge
- Dust-free operation thanks to built-in dust suction
