Description

The KÄRCHER A 2801 plus is equipped with an automatic cable rewind. A telescopic suction tube that can be adjusted to the individual user's height makes for fatigue-free working.

Features include the Eco flat pleated filter, an innovation from the professional segment that enables the user to wet and dry vacuum without changing the filter.

The dirt container capacity is used to the full because the filter does not jut out into the container. A separate flap enables the filter to be checked and changed easily without users getting their hands dirty.

To extend periods of uninterrupted working, the KÄRCHER A 2801 plus has a manual filter shake-out system that enables the filter to be cleaned quickly without opening the container cover. The filter status indicator shows when the flat pleated filter needs shaking out or the paper filter bag needs changing.

Wet and dry vacuum cleaners

A 2801 plus

The practical accessory storage facility ensures that the accessories are always ready to hand and stowed so that they do not get lost.

Be it wet or dry dirt, coarse or fine, the Kärcher wet and dry vacuum cleaner picks up almost everything.

Its compact, robust construction makes it suitable for a wide range of jobs in the car, garage, cellar, hobby room, workshop or when carrying out renovation works.

Even blocked waste pipes can be cleaned easily with the Kärcher wet and dry vacuum cleaner.

For particularly coarse dirt, the appliance is equipped with additional accessories in nominal width 60. This enables, e.g. leaves and wood shavings to be sucked up without any problems.

Switching to the dry suction nozzle (nominal width 35) enables carpeted floors to be vacuum cleaned easily.

Application

For clean-ups in the car, garage, basement and hobby workshop.

Ideal for modification and renovation work.

Dry vacuuming fine dust with paper filter bag.

Vacuuming of coarse dirt.

Vacuuming of liquids.

Features & Benefits

2 smooth running casters, 2 big wheels

Optimal stability while working, easy pulling.

Air cooled bypass turbine

Trouble-free wet and dry vacuuming suction air und cooling air are separated from each other.

Fan and engine are strictly kept apart.

Filter status indicator

Shows when the flat pleated filter needs shaking out or the paper filter bag needs changing.

KÄRCHER Eco flat pleated filter system

Wet and dry vacuuming without changing the filter. Larger usable container volume because the filter does not jut out into the container. A separate flap enables the filter to be checked and changed easily.

Manual filter shake-out system

For longer periods of uninterrupted working activated by a pull handle on the unit.

Mechanical floater system

As soon as the maximum water level has been reached, further vacuuming of water and dirt is automatically interrupted to prevent overflowing.

Wet and dry vacuum cleaners

A 2801 plus
