Product Summary

Product Detail

Operational efficiency

Unparalleled modularity & customization. As unique and flexible as your business. Incomparable efficiency for the **highest battery autonomy and productivity.** TASKI ULTIMAXX scrubber driers drive out unproductive time. With the all new ULTIMAXX range go further fully customize with **IntelliTouch, IntelliZone** and even a **TWISTER** button for perfect results time after time all at your finger tip. Never before has the **ultimate in cleaning excellence and efficiency** been made so easy to achieve.

People & Safety

TASKI ULTIMAXX scrubbers driers are **ergonomically designed** for the user. Ergonomic handle means **comfort is assured**. ULTIMAXX **IntelliTouch** is an intuitive touchscreen dashboard with common icons meaning **little training is needed**. Where training is required users can connect to a suite of support tools including the ability to watch videos and access interactive applications. Choose ULTIMAXX and opt for EBU (electronic brush lifting unit) then there no need to touch brushes or pad drives. Choose **Intelliscrub** and mechanical cleaning pressure can be precisely adjusted. For complete customization choose **IntelliZone** to set all parameters perfectly for one pass cleaning, every time

Infection prevention

TASKI ULTIMAXX delivers **excellent air quality** alongside scrubber functionality. The new range includes, as standard, **patented TASKI whisper technology**. The optional **HEPA H13 filter** can be relied on to capture pollen, fungal spores, bacteria and other microscopic particulates. TASKI **IntelliBac** uses special materials with anti-bacterial properties within the plastic tank and around the machine. This special material significantly **reduces bacterial and fungus growth on**

surfaces. This is essential where the **highest hygiene standards** have to be met, like in healthcare facilities.

Sustainability

TASKI ULTIMAXX Performance models feature **IntelliFlow for up to 50% more m² covered** on a single tank fill. IntelliFlow with **IntelliDose can reduce water and chemical consumption by over 70%.**

ULTIMAXX fitted with new **IntelliDose+** offers 2 options for full flexibility. Diversey **super concentrates** or customer choice standard concentrates.

For both options **Intellidose+** guarantees **exact dilution control with zero chemical wastage.**

Cost control

TASKI Service Options **minimise downtime, fix costs and will extend the life** of your ULTIMAXX scrubber drier.

With the all new ULTIMAXX **IntelliPredict** and get access to state-of-the-art electronic technology, connecting and controlling all electronic parts like motors, pumps and chargers. ULTIMAXX will fundamentally change the landscape to a proactive uptime management model with predictive component management. Take advantage and **save typically 25%** on your repair bills.

Working capital optimization

With up to 3 x times faster charging **IntelliPowered** ULTIMAXX scrubber driers are always available when conventional batteries are still on charge. Meaning a second machine may not be needed. Choose the all new ULTIMAXX with IntelliScrub and **extend yet further your battery autonomy. Up to 70% longer.** Now that's real return on investment.
