

DS 5600 Plus \*EU

**Short description:**

---

The KÄRCHER DS 5600 Plus is a vacuum cleaner for private households which can also pick up small amounts of liquid. Due to its unique water filter system smell when vacuuming and dust clouds when changing filter bags are a thing of the past. It's ideal for allergy sufferers.

---

**Description:**

---

The KÄRCHER DS 5600 Plus vacuums all kinds of floors in the home with a constantly high suction power and excellent cleaning results.

Thanks to its revolutionary water filter system vacuuming is no longer accompanied by unpleasant smells, sneezing fits or clouds of dust from having to change filters.

When vacuuming with the KÄRCHER DS 5600 Plus, the dust-laden air goes through the water filter where almost all of the dust particles are reliably bound. The air then flows through the washable, long-life auxiliary filter which retains any remaining minute airborne particles. Next comes the HEPA 12 filter, a high-efficiency filter, which retains particles to a size of 0.3 µm. It thus provides a protective screen against mites, pollen, spores and fungi.

The KÄRCHER DS 5600's dust retention rate of 99.99 % guarantees really clean exhaust air, cleaner in fact than the ambient air. This is a safety factor which helps allergy sufferers in particular.

In addition to the standard accessories the DS 5600 mediclean comes with a turbobrush which guarantees even better cleaning results than a normal floor nozzle due to a rotating cleaning brush system.

---

**Application:**

---

Vacuums carpeted and hard floors and upholstery in the home. Picks up small amounts of liquid. Particularly suitable for those who suffer from allergies, especially household dust allergy.

---

## Features:

---

### 360° joint in handle

Hose can be turned 360° in the handle, prevents suction hose from becoming twisted while vacuuming

### 5,5 m power cord

Operating radius of approx. 8m, saves frequent unplugging/plugging in larger homes

### Automatic cable rewind

Power cord winds completely at the push of a button

### Changeover dry vacuuming tool

Comfortable foot switch to change from carpet to hard floors (tiles, parquet, ...)

### Dust and dirt separation via water filter

No dustbag required and all coarse dirt particles are bound in the water bath, no more dust and constant high suction, no uncertainty whether bag is full, can be emptied without stirring up dust, shows result of work / dirty water

### HEPA 12 filter system

Retains bacteria, mildew spores, pollen, mites, etc., ideal for allergy-sufferers and people sensitive to dust., 99.99 % dust retention of all particles larger than 0.3 µm

### Parking device

Floor nozzle can be hung on side of vacuum cleaner, fast access / no bending down

### Telescopic suction tube

Optimal working convenience by individually adjustable stick length

### Washable motor protection filter

Longer lifetime, constant suction power

### Wet vacuuming of small amounts of liquids

Vacuuming up to 0.5 l (e.g. a dropped glass of water)

#### Technical data:

---

Dimensions (L x W x H)	480 x 305 x 500 mm
Operating radius	7,5 m
Motor rating	-
zusätzliches Aufsaugvolumen	-
Filter bag capacity	-
Frequency	50-60 Hz
Weight without access.	8,5 kg
Length of cord access.	5,5 m
Power	max. 1400 W
Air flow rate	55 l/s
Sound pressure level	69 dB(A)
Voltage	220-240 V
Vacuum	255 mbar
Water filter	2 l

---

#### Scope of supply:

- "Foamstop" defoamer
- Crevice tool
- HEPA 12 filter
- Parking and stowing aid
- Upholstery tool
- Suction hose 2 m
- Soft grip surface on handle
- Telescopic suction tube
- Turbo brush
- Switchable floor nozzle
