

Submersible Clear Water Pumps

SCP 9000 *EU II

Help is needed quickly when there has been a spill in the laundry room or the basement has been flooded by a storm, or when it is time to spring-clean swimming pools or ponds. These situations are the domain of Kärcher's powerful, submersible draining pumps which transfer the water to another location in no time at all.

Approved Kärcher quality. The compact entry class submersible pump for a quick evacuation or transfer of clear and slightly contaminated water. Robust and powerful. Changeover from normal mode to flat pick-up. By simple foot adjustment the pump can be used for slightly dirty water as well as for low level suction. Suction already starts at a low water level. The pump already starts automatically at a level of ≥ 1 cm. Extension of application areas, increase of handling comfort. Push-button priming. Easier handling/time saving because of direct influence possibility. Comfortable carrying handle. Comfortable transport and handling. The ergonomic handle makes it possible to lift the pump from all sides. Optimised level switch. Increases the switching accuracy in comparison to the competitors. Optimised union. Enables the simplest connection esp. with large diameter hoses. Additionally it minimises the danger of damages to the thread. Incl. adapter with G1 inch inner thread. Suitable for 3/4 and 1 inch hoses.

Standard accessories:

- Rail handle
- Optimised filler neck
- Suction already starts at low water level
- Switching possibility from normal use to low level suction
- Ventilation by pressing button
- Free sensor positioning

Order no. 1.645-167.0

EAN-code 4039784223646

Pallet size 54 units

Technical Data

Motor capacity	300	Watt
Max. output quantity	9.000	l/h
Max. water bead / pressure	7 / 0.7	m/bar
Max. particle size	5	mm
Max. immersion depth	9	m
Flat suction down to	1	mm
Connecting thread	G1	
Power supply	1 / 230 / 50	~ / V / Hz
Dimensions (L x W x H)	180 x 195 x 280	mm
Weight	4.2	kg
