Weight kg	9
Dimensions (L x W x H) mm	275x360x1250

Description

Professional cleaning demands high standards of engineering and quality.

Kärcher brush-type upright cleaners incorporate modern technology and unique product benefits that meet all the requirements of professional vacuuming, sweeping and maintenance.

Everything is engineered to the quality you expect from Kärcher: No compromises have been made.

A manual adjustment enables you to set the brush to the ideal height for the pile being cleaned. An electronic indicator shows you when the adjustment is right. And if the brush becomes blocked for any reason, the electronic control switches off the unit before any harm can be done.

Upright brush-type vacuum cleaners

CV 36/2

Suction tube for problem areas.

Kärcher upright vacuum cleaners are equipped with a detachable suction tube for vacuuming upholstery and getting into awkward corners and other difficult-to-reach areas. A quarter of a turn is all that is really to release the suction tube from the unit. The brush motor is switched off automatically while the suction tube is in use. This avoids unnecessary brush wear and protects the carpet too.

The replaceable brush strip is a really good idea.

There is no need to replace the entire roller brush, only the brush strip. That helps save time and money. An automatic brush pressure release mechanism is activated when the unit is at a standstill to keep the brush in perfect shape and avoid damage to the carpet.

Up to medium large areas are cleaned quickly with the CV 36/2.

Be it in shops, showrooms, offices, ticket halls, hospitals, hotels, restaurants or private households, the working width of 360 mm cleans even large areas in no time. The metal sole plate ensures a long service life in tough professional applications.

Robust and durable.

Application

For textile floor cleaning.

Mechanical brush action makes the pile sit up.

Features & Benefits

Bristle strip is exchangeable

Economic and practical because the roller doesn't have to be changed with its bearings.

Brush roller driven by toothed belt

Optimum efficiency, economic and practical

Detachable suction tube

Enables surfaces to be cleaned that cannot be reached with the brush head

Device to prevent unit being used without filter bag and safety filter

Protection against operator errors

Upright brush-type vacuum cleaners

CV 36/2

Electronic brush condition monitor

Optimum indication of condition of brush roller, correct height adjustment, bristle wear, brush blockage

Flat and wide brush head

Cleans close to walls and under furniture

Housings of vac and brush head made of high grade ABS plastic

Sturdy, impact resistant for heavy-duty applications , recycable.

Triple filter system, paper filter bag, motor protection filter, exhaust filter

Optimum filtration and max. utilization of filter bag capacity by filling from above. Protects motor against dust and dirt. Additional filter for exhaust air.
